Distribution of U.S. K-12 Campus Shooting by Race: 2009-2018

Most of the cases happened in the east, and the victims were white.

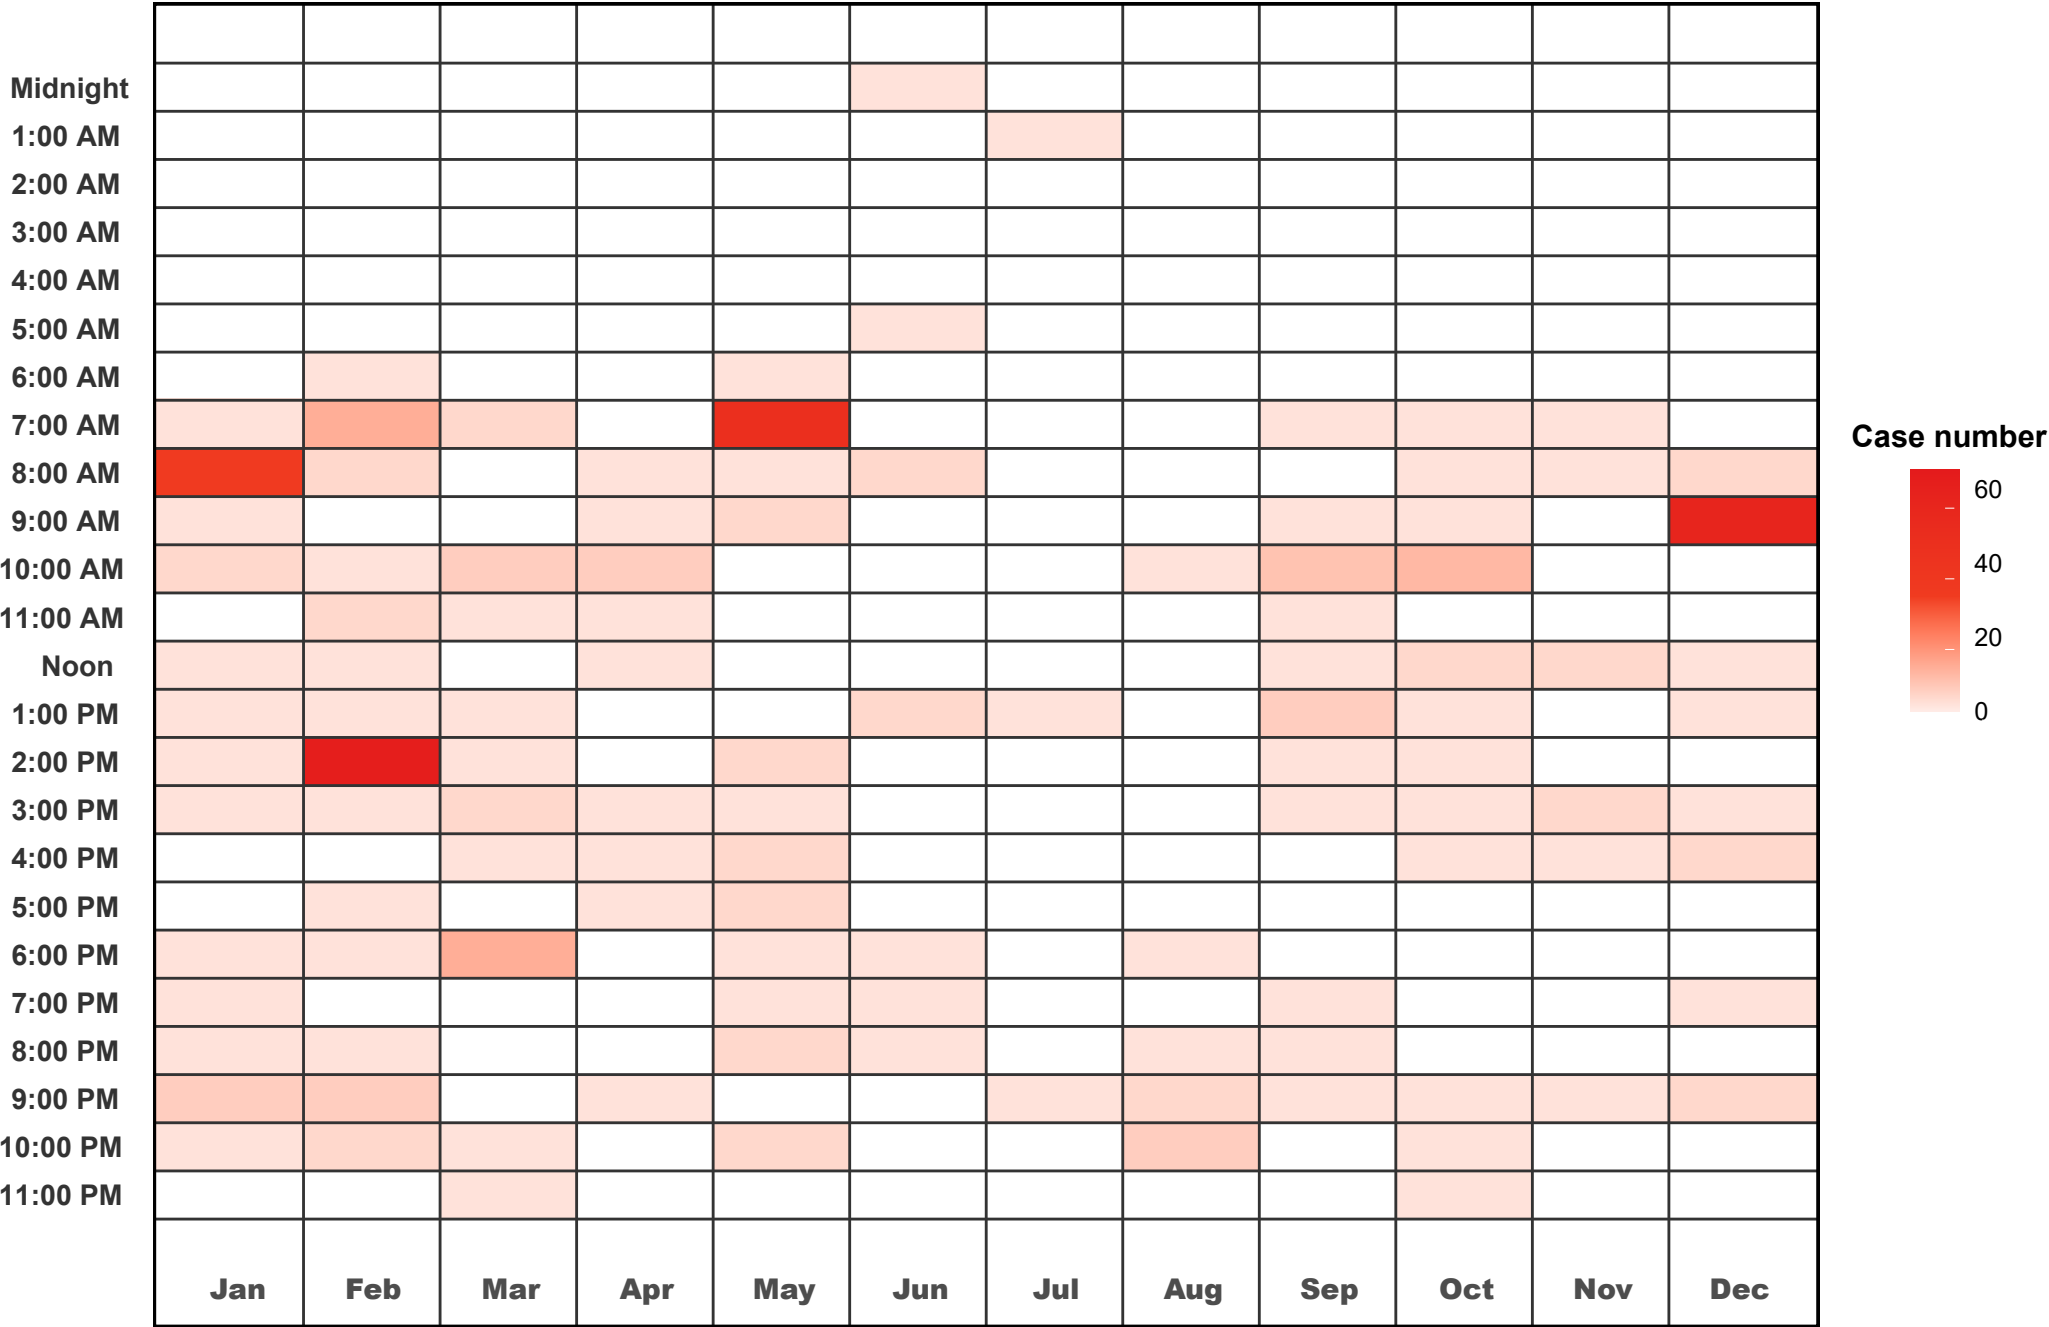

Source: Cable News Network (CNN)

From 2009–2018, U.S. K–12 campus shootings tended to occur in the spring and winter mornings when students were heading to school, and at lunchtime.

In 174 cases with known time, more than half happened in the spring and winter around 7–9 AM (local time), when students entered the school for their first class. Killed, injured, and victim cases are included.

The white area indicates that there were no recorded shootings during that period.

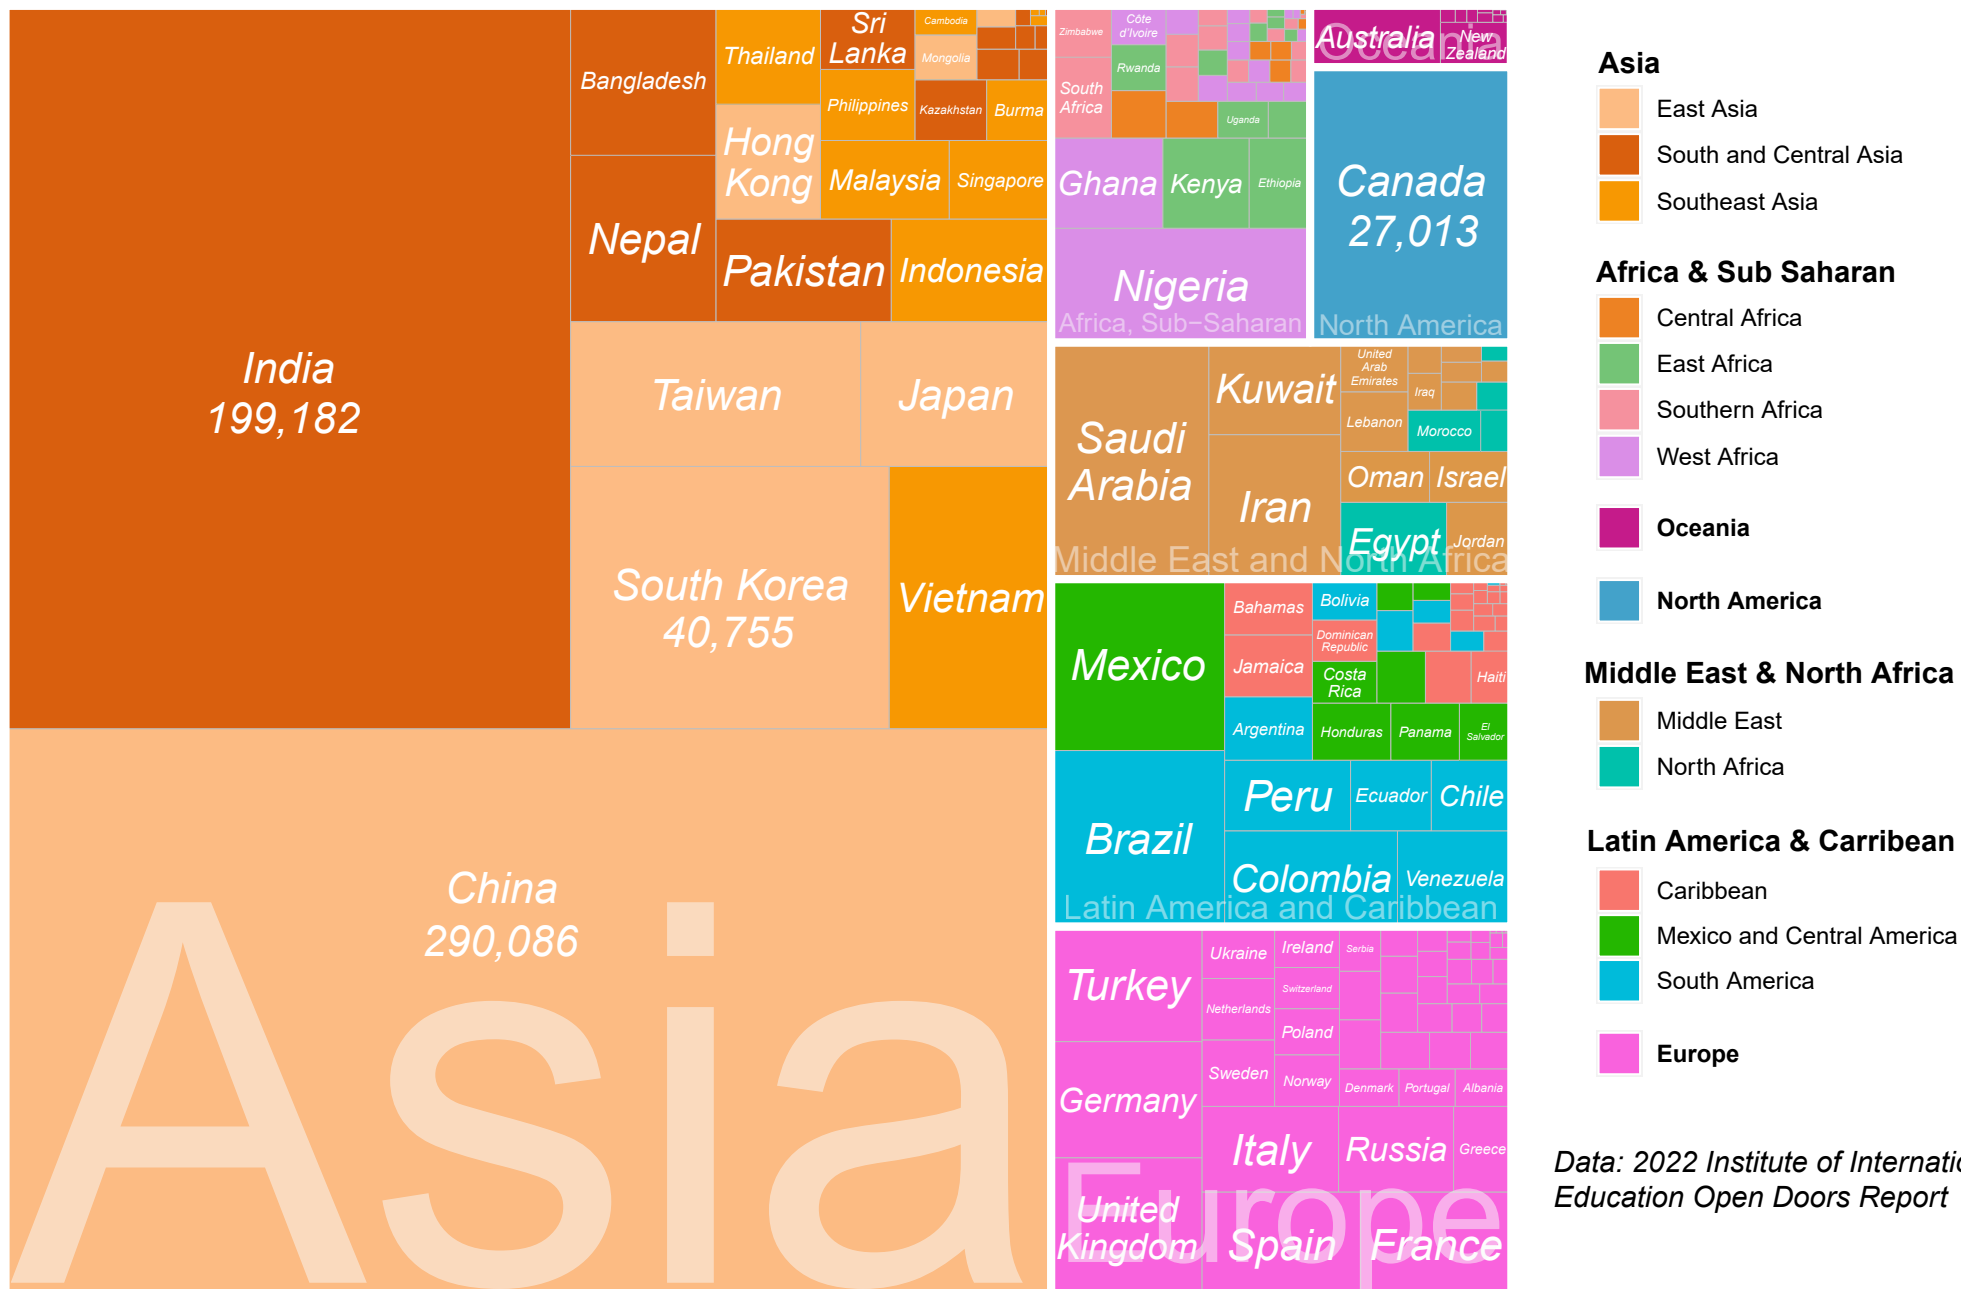

From all education levels, almost half of the Asian international students come from China in U.S., 2021–2022 academic year

The area of each square represents the number of international students in that region.

By region, the population of students coming from Latin America & Caribbean was approximate to the population of students coming from Africa, Sub-Saharan plus students coming from North America and Oceania.

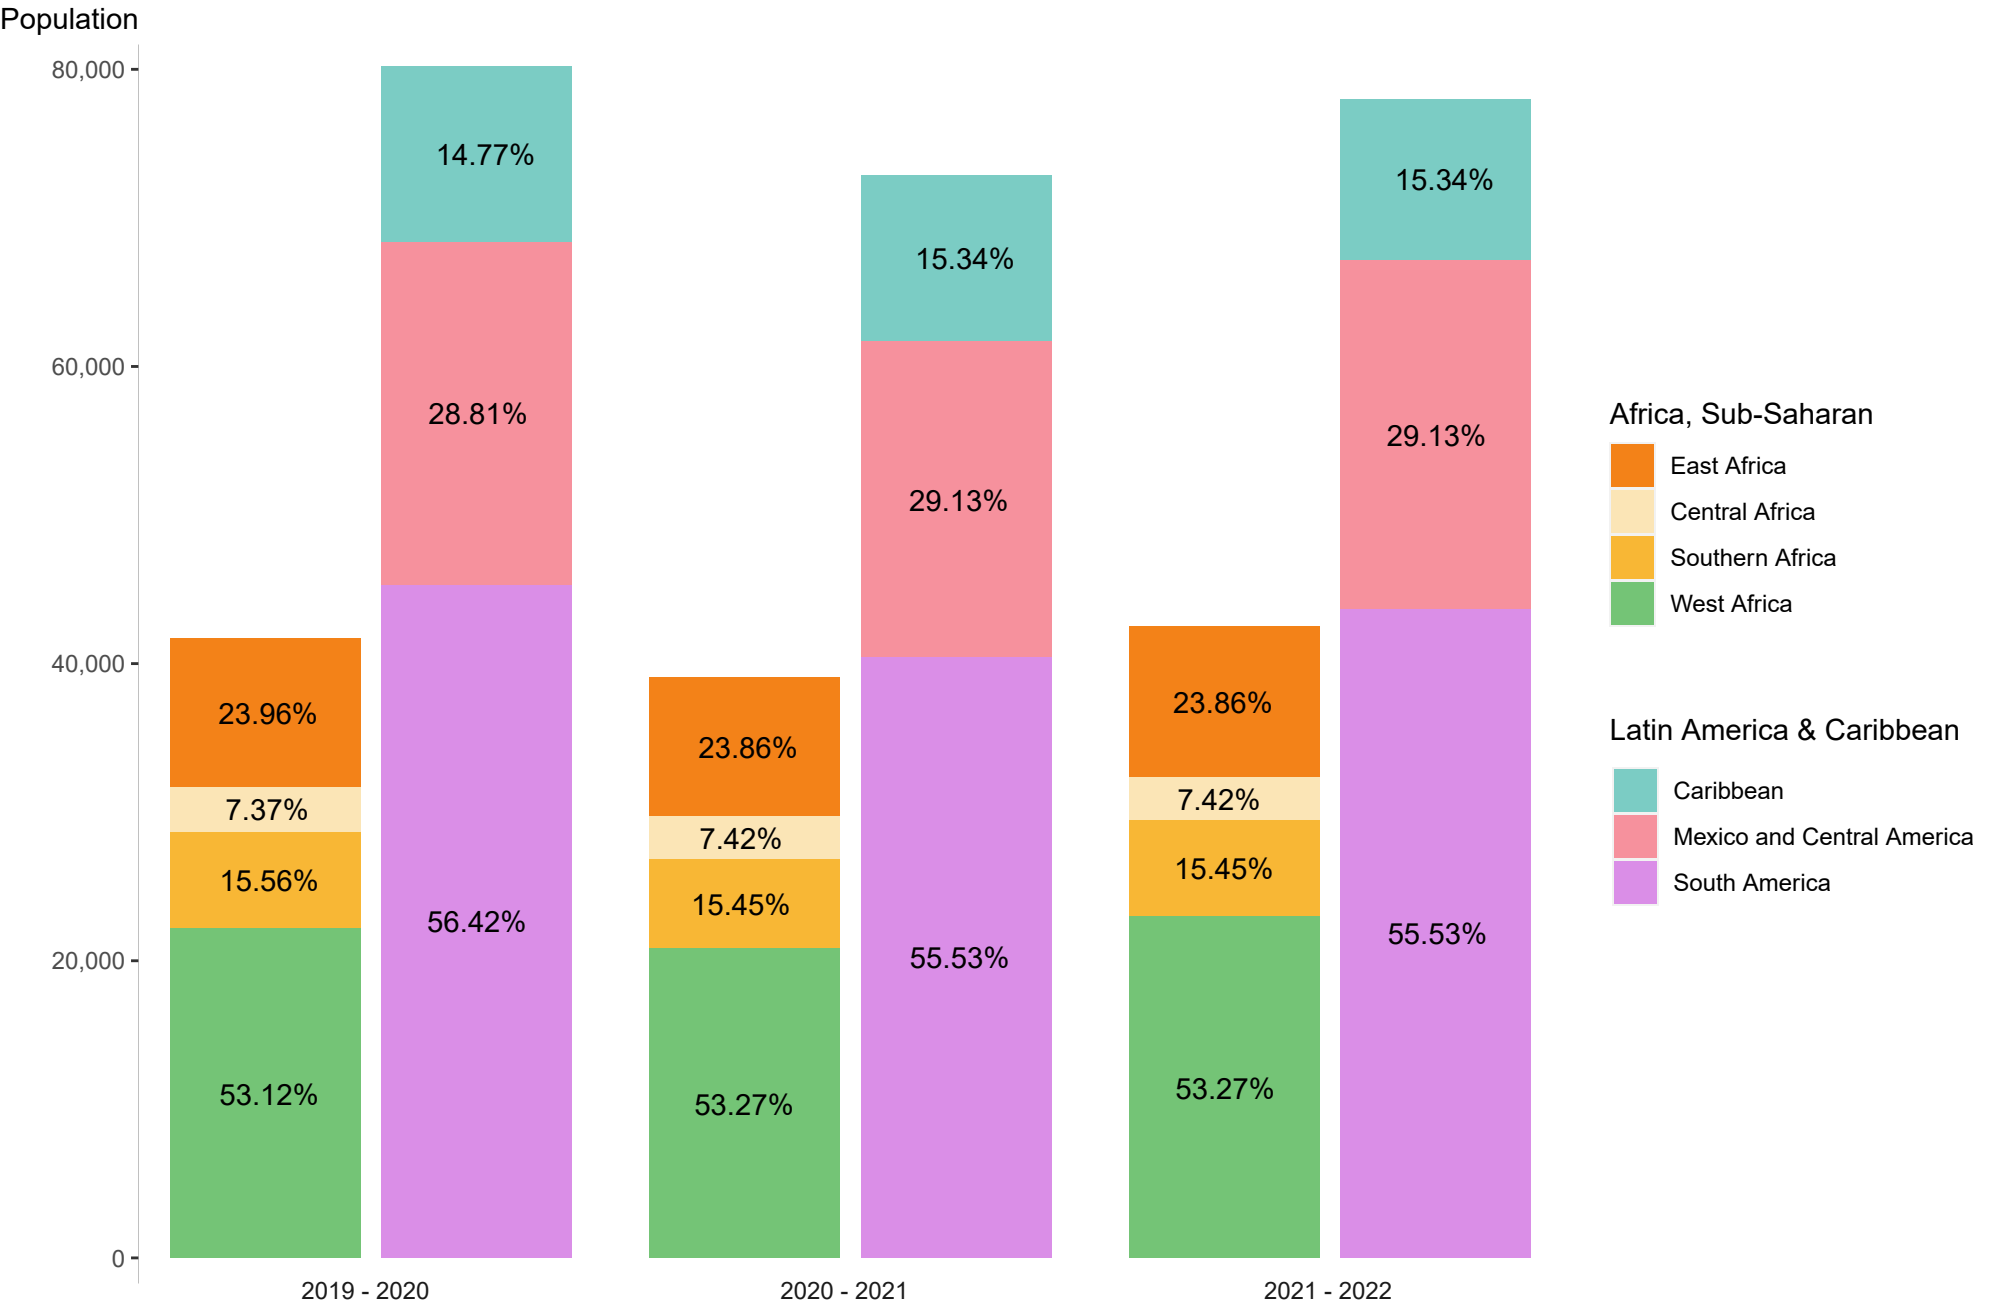

By sub-region, East Asian students was still the largest part of U.S. international students' group during the pandemic.

Data: 2022 Institute of International Education Open Doors Report

During the pandemic (2020–2022) in the United States, the enrollment rise of both foreign students from Africa and Latin America followed a U-shaped trend.

International students from Africa and Latin America primarily originated in West Africa and South America, respectively, from a geographical standpoint.

INTERNATIONAL STUDENTS POPULATION GROWTH TREND IN U.S. HIGHER EDUCATION

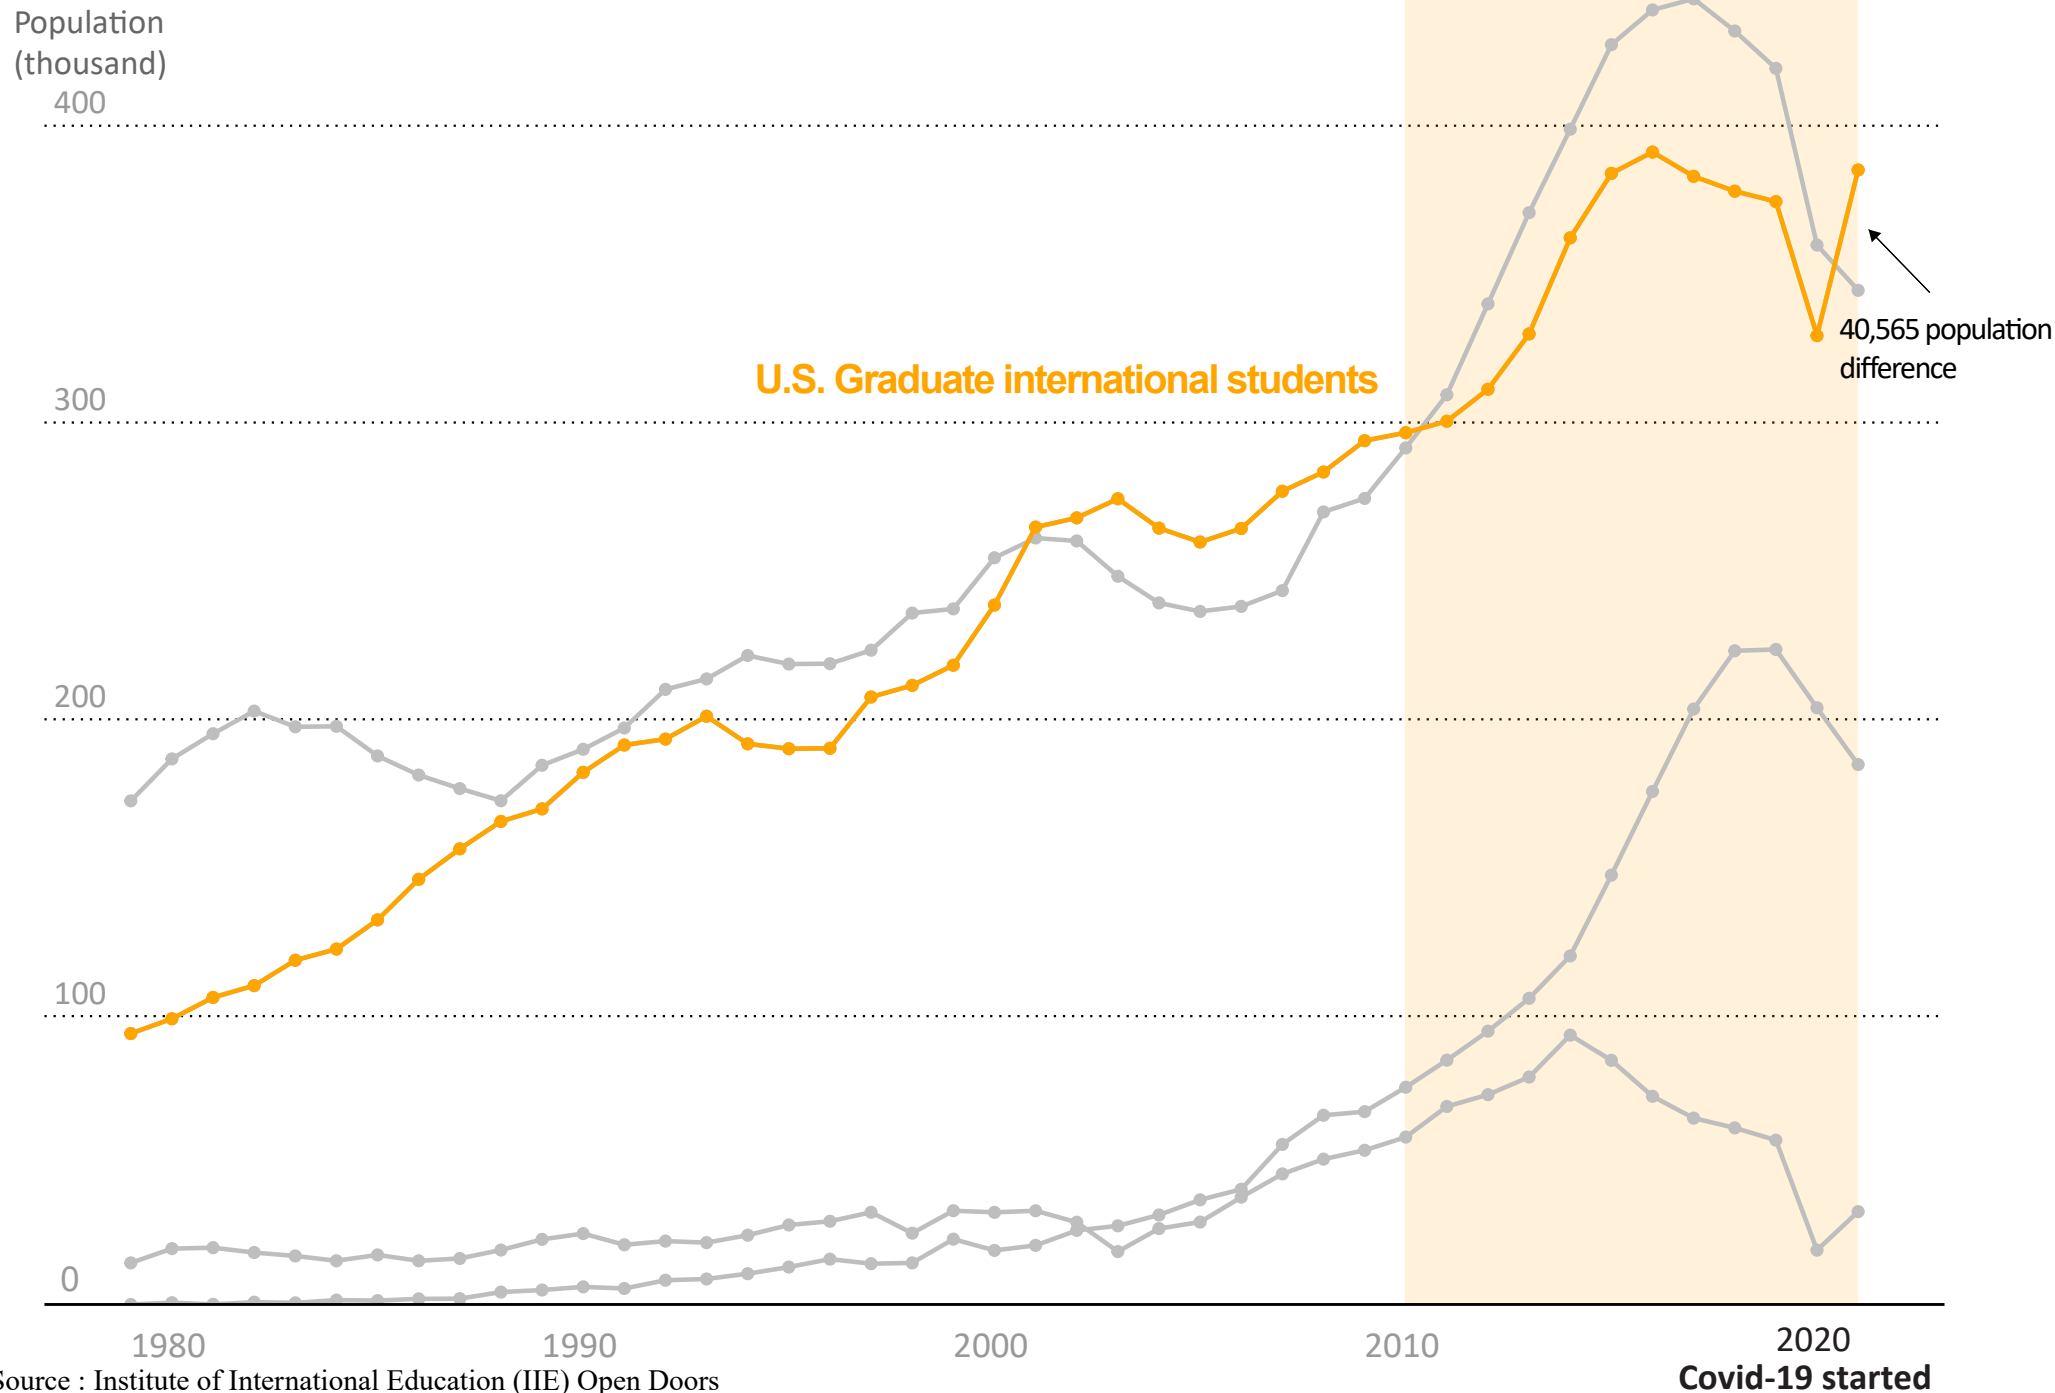

By academic level, 1979/80 – 2021/22 academic year

OPT refers to optional practice training

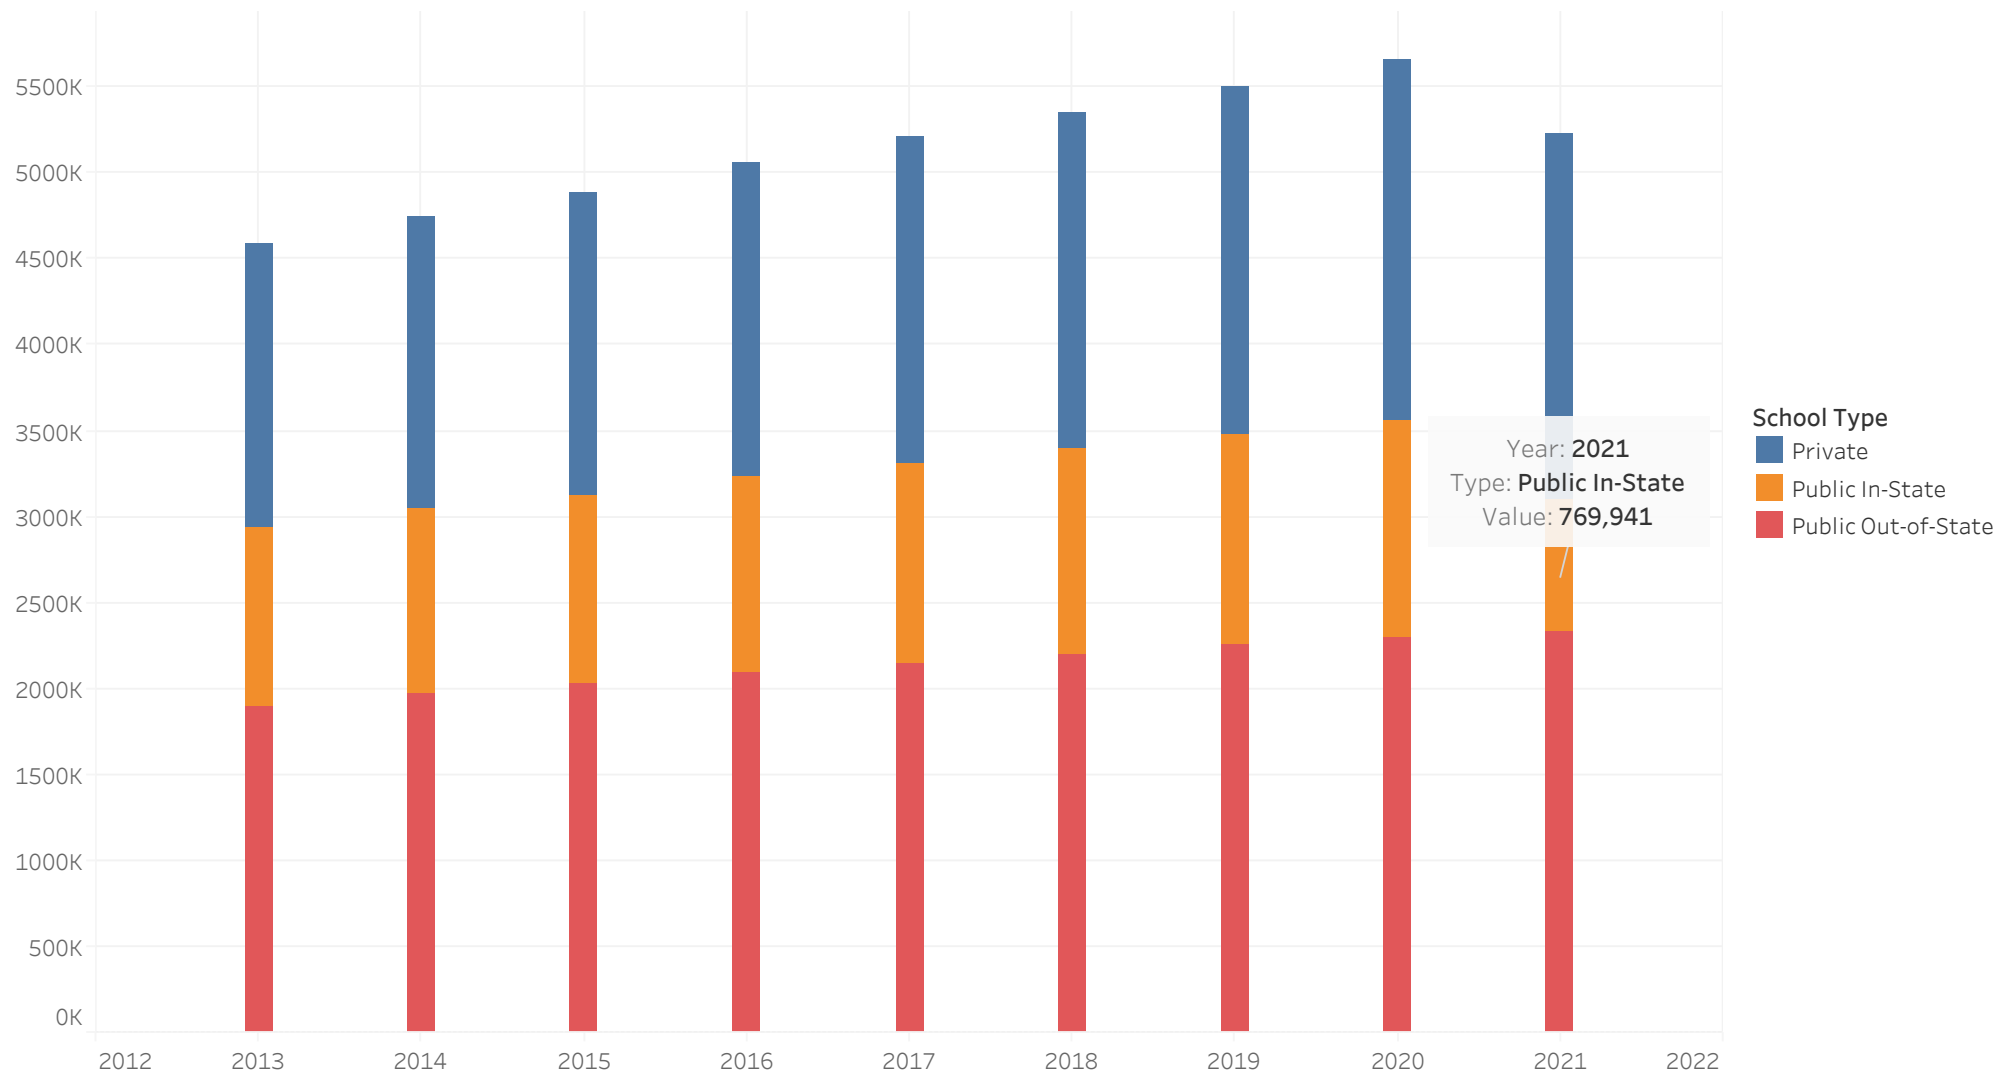

10 years later, international students at the graduate level in the U.S. were once again the largest share of international students during the pandemic.

Following the same trend of change as the undergraduate cohort since the 1990s,
the U.S. graduate international student population has more significantly outpaced the cohort than it did in the early 2000s.
